## Kyberpass technology Identrus-compliant

By *InBusiness Media Network staff*

Kyberpass Corp., an Ottawa-based designer of security software for Internet transactions, said Monday its digital signature messaging system has been deemed usable for a major e-commerce group.

After testing, Kyberpass Trusted Services Gateway, an application with features to secure and simplify electronic-commerce transactions, has been deemed Identrus-compliant.

Identrus is an organization set up by financial institutions around the world to develop global e-commerce infrastructure.

"The unique plug-and-play architecture of their Identrus compliant DSMS, combined with their long history of helping large organizations PKI (public key infrastructure)-enable applications, will be invaluable to the Identrus community," Dave Oshman, Identrus' vice-president of technology, said in a statement.
